Chrysanthemums

Grown and for Sale by

SHADYCOVE ACRES

G. M. Clark and J. D. Clark

ISSAQUAH, WASHINGTON

File away and keep this catalog as we will issue only
a supplement next year.

To Our Patrons:

The heights and dates given for maturity are based on average growing conditions for May and June planting. These dates vary in different localities and with climactic conditions. Plants are available from late April to the last of June.

TERMS OF SALE

Cash with order. No collect on delivery orders accepted. No orders for less than \$1.00 can be accepted, due to packing and postage. No charge for postage or express except beyond the third postal zone when a flat charge of 25c will be accepted to cover charges. Claims for damages must be assumed by the buyer and entered against the carrier by him.

NON-WARRANTY

We make every effort to keep plants true to name, and to supply good strong plants. We pack carefully and use utmost care in filling orders, yet we can give no warranty, expressed or implied, and can not guarantee or be in any way responsible for the crop, either as to variety or product. All orders received will be filled on these conditions, and must be so accepted by the customer. However, we will replace improperly named varieties in a later order if we have ample notice by the customer.

SALES TAX

Washington sales tax applies to all orders or sales within the state. Be sure to include it with order.

LOCATION

Shadycove Acres is at the southwest corner of Lake Sammamish. It is on the lower road of the Floating Bridge Highway. A sign is at the entrance. Our house is a low bungalow with a red roof.

PRICES

Except on the Exhibition and Spider types our prices are 35c each; 3 for \$1.00; 6 for \$1.75; and 12 for \$3.00. Due to the readiness with which some kinds propagate, we can offer 16 for \$3.00 if we are allowed to make the selection of the kinds. These will not include the Exhibition or Spider types. They will cover the Early Flowering, the commercials, the anemones, and from the general list.

The Exhibition and Spider types are 50c each; \$5.00 a dozen.

We expect to have the Exhibition, Commercial, and Spiders grown in pots or bands, but due to their bulk we cannot mail potted plants, still in the pots or band. The pots or bands will be removed if sent by mail. They will be available at our gardens at no advance in price.

Early Flowering Chrysanthemums for the Garden

CULTURAL SUGGESTIONS

In preparing the soil, it is necessary to have ground deeply dug, and if not in very good condition it should be manured the previous autumn or at the time of digging.

The time for planting is from early May until the middle of June although this rule need not be strictly adhered to, as I have obtained splendid results in planting right through into July.

It is necessary to plant firmly and set plants about 18 inches apart each way and keep the ground in moist (not wet) condition at all times. In late plantings the plants may be set 12 to 14 inches apart. I recommend a second planting in early July for the Coast area.

The method of stopping and disbudding varies according to the purpose which the grower requires, whether for garden decoration or exhibitions. A good general rule, however, is that the plants should be pinched back to within 5 or 6 inches of the ground as soon as they have started a healthy growth after planting. Then if required for exhibition, 3 to 6 of the shoots which are produced from the joints can be retained and the remainder taken away. Keep these growing shoots free from insect pests, etc., with the usual spraying and retain the crown bud on each shoot.

If required for cut-flower or garden decoration no thinning or disbudding is necessary after stopping.

The ground should be kept free from weeds by frequent hoeing and applications of weak liquid manure or a balanced fertilizer (2 oz. per sq. yd.) may be applied alternately every week or 10 days until the buds begin to show color, not longer.

I sometimes add a tablespoonful of equal parts superphosphate and bone meal in hole for each plant at time of planting.

Unless the ground is well drained, dig up plants in the fall and winter them over in a cold frame or a dry sheltered spot outside where they can get air—not in a basement.

ORDERING

We seem to have quite a supply of stock plants, yet we know that of some kinds we are rather short. If you do not want us to substitute when we are short of a kind, please say "No Substitutes." If we have to substitute, we will use kinds that are similar to the ones ordered. It is no small bother to return money in small amounts, hence we will ask you to name a few second choice kinds. If you order a dozen, name a few from which we can select substitutes. This will enable us to fill the order complete without the trouble of making a refund. Orders are filled in the order received by us, hence we can fill early orders more completely than late ones. Hence order early.

English and Early Flowering Chrysanthemums

Date of flowering, height, etc., are approximate.

35c each; \$3.00 per dozen

- ADORATION**—Cream with pink shadings, a real beauty, 3 ft.Sept.
